## PRODUCT MANAGEMENT LEADER

---

Senior Product Management executive with 15+ years building Identity, Fraud, and Compliance platforms for regulated financial services, with deep expertise spanning CIP, KYC, KYB, and AML compliance frameworks. At Equifax and LexisNexis Risk Solutions, translated complex identity-verification and financial-crime compliance requirements into API-driven, enterprise-scale product strategy — securing \$6M in executive funding for platform evolution and leading cross-functional, Agile organizations of 45+ from business case through go-to-market. Brings proven regulatory-to-revenue execution and enterprise-scale product leadership to a VP of Product Management mandate across Identity, Fraud, and RegTech portfolios.

## SKILLS

Spanish – Fully Bilingual (native fluency, written & spoken) | Portuguese – Novice | Italian – Novice

## PROFESSIONAL EXPERIENCE

---

### EQUIFAX – USIS, Alpharetta, GA

**May 2021 – June 2026**

#### *Senior Director, Product Management – Identity, Fraud & Compliance*

*April 2022 – June 2026*

Directed the development of the USIS Credit Header API. A foundational data asset enabling banks and fintechs to meet CIP and KYC identity-verification requirements at customer onboarding, capturing a critical market gap and accelerating time-to-market for new enterprise risk and compliance offerings.

- Pioneered the integration of Generative AI technologies (Gemini, NotebookLM, Confluence ROVO) and engineered custom data-processing scripts (Co-Lab) to rapidly translate large-scale identity and compliance data payloads into actionable risk insights for executive stakeholders.
- Accelerated enterprise sales cycles with regulated financial institutions by architecting a production-grade, API-driven demonstration portal that let compliance and risk stakeholders evaluate identity-verification capabilities in real time before purchase.
- Architected a Purpose View data-governance framework that mapped permissible-use rules directly to CIP, KYC, and KYB requirements — giving regulated clients auditable, compliance-aligned access to credit header data while enabling flexible pricing and faster time-to-market.
- Directed a team of product managers co-leading development and data-governance strategy for the Contact & Locate solution, purpose-built to reduce friction in customer onboarding and identity-verification workflows.
- Delivered and launched the Contact and Locate Suite – 6 products via API and automated-billing Batch delivery – cutting onboarding friction for KYC/CIP verification workflows and driving a sales pipeline of +\$8M with enterprise risk and compliance buyers.

#### *Director, Product Management*

*May 2021 – April 2022*

Led Digital Identity Trust (DIT 1/2.0) & RAE (Hamilton) solutions to mitigate consumer fraud for main business units under EWS, D2C, and ID Watchdog Canada online applications and IVR that interact with external users.

- Launched 16 new internal & client-facing use case workflows, including Spanish Credit Report, IVR, SafeRent, Fidelity, and Data Visor.
- Directed a massive enterprise Cloud Transformation (AWS to GCP) for the RAE & DIT suite, slashing operational costs and cloud footprint by 69% while maintaining continuous product performance.
- Managed a \$4M operating and build budget, leading cross-functional architecture and D&A teams to execute cloud transformation initiatives.

### LEXISNEXIS | RISK SOLUTIONS, Alpharetta, GA

**January 2016 – April 2021**

#### *Senior Product Manager, Customer Identity Access Management & Fraud*

*January 2019 – April 2021*

Drove the Risk Defense Platform expansion in the insurance market for Identity and Fraud, supporting KYC and AML identity-verification and financial-crime compliance requirements while educating the sales force and clients to adopt best practices that reduce friction in the customer experience, reduce cost of fraud, and modernize business workflows to increase self-service models.

- Introduced Device Intelligence strategies and integrated the platform with the Digital Identity Network via ThreatMetrix to leverage existing enterprise-grade clients already in the book of business.
- Architected a Bundled Solutions strategy that simplified the value proposition for clients, providing predictable pricing and accelerating their time-to-market.

- Partnered with Vertical Market Planning, NPE, and Technology teams to educate them on new Fraud Prevention solutions, closing the integration gap with the Risk Defense Platform and ThreatMetrix's ecosystem.
- Championed a customer-centric product innovation strategy, directing the design of a simplified UX that dramatically reduced friction and accelerated policy quote generation.

#### **Senior Product Manager, Identity & Fraud Management Solutions**

*January 2016 – December 2018*

Drove the Risk Defense Platform growth strategy with a focus on delivering high value to clients and internal adoption. Defined the global product roadmap and tracked revenue and transaction metrics; co-led core team members and stakeholder product managers, driving a 45-member development team through Agile methodology to authenticate identities and detect and prevent fraud.

- Successfully pitched and secured \$6M in executive funding by authoring a comprehensive business case for the future evolution of the Risk Defense Platform, directly impacting long-term organizational revenue.
- Authored and executed a 3-year strategic vision for the Risk Defense Platform, aligning product capabilities with long-term enterprise revenue goals.
- Led a 45-person cross-functional engineering and product organization through Agile transformation, optimizing resource allocation and accelerating feature throughput.
- Instituted internal business processes enabling Product and Engineering to work more efficiently while increasing focus on a customer-centric mindset.
- Influenced senior leadership and secured executive buy-in for product strategy, delivering with a focus on impactful Go-to-Market outcomes.
- Drove the training and re-formation of smaller Agile teams specializing in 4 functional areas, increasing focus and throughput.

#### **NTT AMERICA & NTT COMMUNICATIONS, Boca Raton, FL**

**January 2010 – January 2016**

##### **Manager, Product Management – Business Applications**

*January 2013 – January 2016*

Defined the product roadmap for business applications, directing SaaS strategy and sales enablement for global marketplace offerings and cloud-based products and subscription services. Built, coached, and directed a 9-person product marketing and management organization.

- Secured 25 new products in 18 months by spearheading internal processes for launching third-party SaaS products into Verio's OSS/BSS platform.
- Acquired 20 new offerings in 12 months by implementing and training a new team to follow a defined process.
- Increased business performance and reduced sales cycle by implementing a targeted sales enablement process that improved lead qualification and prospecting.
- Brainstormed and delivered strategic market advice to senior leaders.

##### **Senior Product Manager**

*January 2010 – December 2012*

Partnered with stakeholders to drive new functionality and innovation for a \$28M product line with 10% growth, serving as the leader of UNIX and Windows Hosting Platforms. Supervised cross-functional teams including development, QA, support, sales, and marketing.

- Developed business case and go-to-market strategy for SaaS launch across multi-region markets.
- Introduced and delivered a long-range strategic roadmap; applied detailed understanding of client and channel needs to develop product requirements for new products and enhancements.
- Steered the UAT process to ensure necessary corrections prior to code release into production.
- Handled market research, marketing collateral development, vendor negotiations, and pricing; implemented cost-savings initiatives by monitoring customer calls, performance reports, and bug queues.
- Advised senior leaders on business cases for new products and enhancements.
